LIVEWORKSHEETS

2) How does each of the adaptation help the plan to survive? Drag and drop the correct definition next to the adaptation.

Thick Roots	
Drip Tip Leaves	
Lianas	
Air Plants	
Bromeliads	
Mangroves	
Pitcher Plants	

They grow on other trees for support.

Prevent rotting of leaves by funneling water.

Their overlapping leaves act like a cup.

Their roots help them grow in water and mud.

They use trees as support to climb higher towards the sunlight.

They eat insects and small animals.

Act like props to make the trees more secure.
