

IMMUNITY MAGAZINE'S INTERVIEW WITH HIV

BY

NAME: _____

DATE: _____

You are a world-famous journalist for IMMUNITY magazine, and you have just gotten the scoop of a lifetime. The very illusive disease H.I.V. has chosen you to interview him about his life and rock music. After three grueling hours of hard-hitting questions, you leave his mansion aware that your interview is a sensation! You are sure that this interview will open the eyes of many people and win you the Pulitzer. However, when you get home, you realize that your notebook is missing H.I.V.'s answers. Only your question page remains. How horrible! But you are sure that you can piece the interview back together by **research** and memory. Below are the questions you asked him. What were his responses? **Be very creative but factual in responding.**

Q1. You are infamous, but what does H.I.V. actually stand for?

H.I.V.

Q2. So, lately, you've been stepping out on the town with AIDS in the celebrity news. What's the real name of your mysterious partner and how are you two linked?

H.I.V.

Q3. I hear you attack human blood. What part of the blood do you destroy, exactly, and just how do you do it?

H.I.V.

Q4. There are quite a few ways that you infect humans, most types of sexual contact being your favorite. But tell me three other ways.

H.I.V.

Q5. Some humans swear that they can get infected by you from a simple peck on the lips. I see you laughing, so I figure that's not true. Tell me three other rumors about how you get around that make you LOL?

H.I.V.

Q6. What three bodily fluids from an infected person carry enough of you to infect another person?

H.I.V.

Q7. What types of Groupies do you prefer? You know, the persons most at risk of becoming infected by your overwhelming personality?

H.I.V.

Q8. Let's talk about your Fan Page. I hear there are three different stages that your Groupies go through before completely succumbing to your calculating charms. What are the names of these stages again?

H.I.V.

Q9. And Healthy Life Magazine says that at each stage, the Groupie can expect different "surprises" called symptoms. Name two symptoms from each stage.

H.I.V.

Q10. There have been some accusations in the news about you killing people. You have always denied this stating that it is a kind of illuminati group called "Opportunistic Diseases" doing the killing. How do they operate, and name two of them....if you dare.

H.I.V.

Q11. Is there any cure for your Groupies' once you're in their lives? And if no, why not?

H.I.V.

Q12. But there are treatments, right? Can you name even two of them for our readers?

H.I.V.

Q13. Some people hate the lifestyle you stand for. I know this is hard to say, but what are three ways these people can avoid you.

H.I.V.

Q14. Which three countries have your biggest Fan bases?

H.I.V.

Q15. Thanks so much for sharing with us today. Your home is actually quite lovely, but too much red and black for me. Anywho, there's this new remix virus on the block called "Corona19". Any insights to your fans on staying away from this one?

H.I.V.
