Earth in Danger

The year is 2080, and the world is a very **1(differently / difference / different)** place. Sea levels **2 (have risen / have rise / has risen)** and flooded millions of homes. London, New York and **3 (much / little / many)** other cities are underwater. The Earth **4 (have become / has became / has become)** a lot warmer and heatwaves are **5 (kill / killed / killing)** crops. People are fighting because they don't have enough food or clean water. Malaria is common in Europe and many of the animals and plants have **6 (disappeared / disappear / disappearing)** forever. This sounds like the story of a Hollywood film. But it will happen if we **7 (keep / kept / had kept)** damaging the environment.

The environment **8 (has affected/ is affected / affected)** by many issues but which ones could cause the biggest problems in the future? Claire Addison **9 (whose / who / which)** is from Edinburgh, works for an organization called Envision in London, **10 (who / whose / which)** teaches teens about environmental issues. "The biggest problem for our planet is climate change," Claire explains. "Greenhouse gases are causing higher temperatures around the world, which is causing ice to melt and sea levels to rise.
