

THE SENSES AND INFORMATION (1)

SIGHT

1 Label the parts of the eye.

pupil

retina

cornea

eyebrow

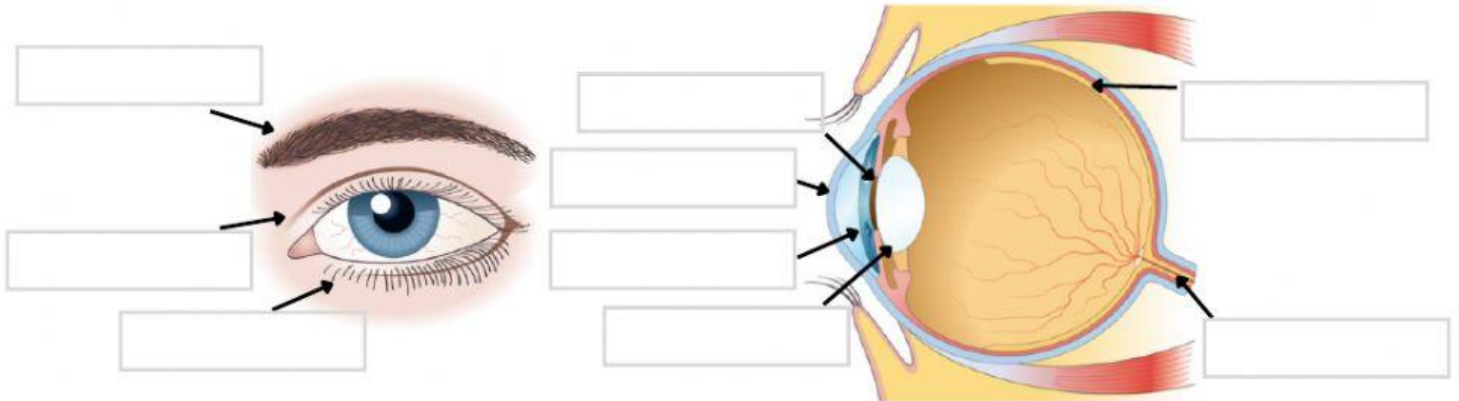

eyelash

iris

optic nerve

eyelid

lens

2 Join each part of the eye with the correct function.

pupil

It controls how much light enters the eye.

retina

It carries electrical impulses to the brain.

cornea

Light enters the eye through it.

iris

It focuses the light onto the retina.

optic nerve

It covers the iris and the pupil.

lens

It turns light into electrical impulses.

3 Choose the correct sentence.

- a) The eyebrows, the eyelid and the retina protect the eye.
- b) The eyebrows, the eyelid and the eyelash protect the eye.
- c) The lens, the eyelid and the eyelash protect the eye.
- d) The iris, the pupil and the eyelash protect the eye.

HEARING

4 Label the parts of the ear.

eardrum

auditory canal

cochlea

3 small bones

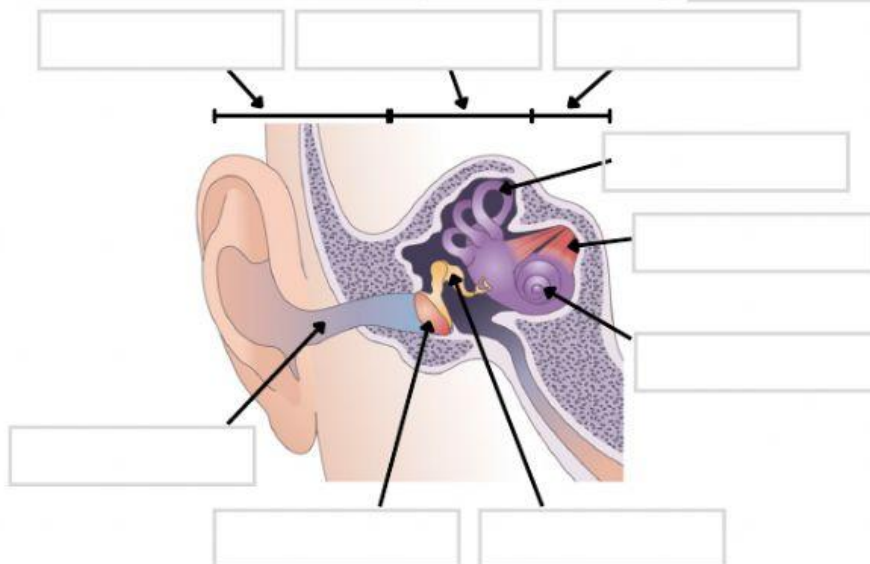

semicircular canals

auditory nerve

middle ear

inner ear

outer ear

5 Join each part of the ear with the correct function.

auditory canal

It transforms vibrations into electrical signals.

cochlea

It vibrates with the sound waves.

3 small bones

They help to keep balance.

auditory nerve

The sound waves enter the ear through it.

semicircular canals

They vibrate with the sound waves.

eardrum

It carries electrical signals to the brain.

6 Choose the correct sentence.

- a) The outer ear is the internal part of the ear.
- b) The middle ear is between the outer ear and the eardrum.
- c) The outer ear is the external part of the ear.
- d) The inner ear is not a part of the ear.
