Exercise 6: Read the passage, and choose the correct answer A, B, C or D for each question

Any list of the greatest thinkers in history contains the name of the brilliant physicist Albert Einstein. His theories of relativity led to entirely new ways of thinking about time, space, matter, energy and gravity. Einstein's work led to such scientific advances as the control of atomic energy, even television as a practical application of Einstein's work.

In 1902 Einstein became an examiner in the Swiss patent office at Bern. In 1905, at age 26, he published the first of five major research papers. The first one provided a theory explaining Brownian movement, the zig-zag motion of microscopic particles in suspension. The second paper laid the foundation for the photon, or quantum, theory of light. In it he proposed that light is composed of separate packets of energy, called quanta or photons, that have some of the properties of particles and some of the properties of waves. A third paper contained the "special theory of relativity" which showed that time and motion are relative to the observer, if the speed of light is constant and the natural laws are the same everywhere in the universe. The fourth paper was a mathematical addition to the special theory of relativity. Here Einstein presented his famous formula, $E = mc^2$, known as the energy mass equivalence. In 1916, Einstein published his general theory of relativity. In it he proposed that gravity is not a force, but a curve in the space-time continuum, created by the presence of mass.

Einstein spoke out frequently against nationalism, the exalting of one nation above all others. He opposed war and violence and supported Zionism, the movement to establish a Jewish homeland in Palestine. When the Nazis came to power in 1933, they denounced his ideas. He then moved to the United States. In 1939 Einstein learned that two German chemists had split the uranium atom. Einstein wrote to President Franklin D. Roosevelt warning him that this scientific knowledge could lead to Germany developing an atomic bomb. He suggested the United States begin its own atomic bomb research.

1. According to the passage I, Einstein's primary work was in the area of ____.

A. chemistry

B. biology

C. physics

D. math

2. Which of the following inventions is mentioned in the passage as a practical application of Einstein's discoveries?

A. Radio

B. Television

C. Automobiles

D. Computer

3. According to the passage, Einstein supported all of the following except ____.

A. nationalism

B. the establishment of a Jewish homeland in Palestine

C. atomic bomb research in the United States

D. the defeat of the Nazis

4. According to the passage in which country did Einstein live in 1930s?

A. Switzerland

B. the United States

C. Germany

D. Israel

5. The word "exalting" in the passage is closest in meaning to ____.

A. criticism

B. elimination

C. support

D. elevation

6. It is clear from the tone of the passage that the author feels ____.

A. Einstein's work in physics was somewhat tarnished by his conservative political views.

B. Einstein's work in physics, though theoretically impressive, led to few practical applications.

C. Albert Einstein was one of the most brilliant thinkers in history.

D. Einstein's theories have been consistently proven incorrect.

7. According to Einstein, light is composed of separate packets of energy called ____.

A. electrons

B. photoelectrons

C. gamma rays

D. quanta

Exercise 7: Indicate the sentence that is closest in meaning to each of the following questions

1. Only their own mother can tell Simon and Mike apart.

A. No one other than their own mother can separate Simon and Mike.

B. Simon and Mike bear some resemblance to each other.

C. It's very difficult to distinguish Simon and Mike.

D. Except for their own mother, no one can talk to Simon and Mike.

2. We have been friends for years. It is quite easy to share secrets between us.

A. Being friends for years, we find it quite easy to share secrets.

B. We find it quite easy to share secrets, being friends for years.

C. We have been friends so that it is quite easy to share secrets between us.

D. Having been friends for years, we find it quite easy to share secrets between us.

3. Those who are riding a motorbike are not allowed to take off their helmet.

A. People must never take their helmet off while they are riding a motorbike.

B. Those who are wearing a helmet are not allowed to ride a motorbike.

C. It is the helmet that one needn't wear when he is riding a motorbike.

D. You should not wear a helmet when you are riding a motorbike

Exercise 8. Indicate the correct answer to complete each of the following questions.
