Worksheet about types of rocks. Look at the picture of each rock and its description, then drag it to the right box.

Conglomerate. Contains large round grains which are cemented together.

Pumice. It has gas bubbles inside the rock

Granite. Large crystals and the surface is coarse (rough, not smooth)

Marble. When limestone was squeezed (high pressure) and heated, this formed.

Igneous intrusive

Igneous extrusive

Metamorphic rock

Sedimentary rock
