

CELL STRUCTURE

1. Drag and drop

a. Ribosome

b. Golgi apparatus

c. Nucleus

d. Endoplasmic reticulum

e. Lysosome

h. Membrane

i. Mitochondrion

j. Cytoplasm

2. Match the correct structure to its function

1. Lysosome

2. Golgi apparatus

3. Nucleus

4. Endoplasmic
reticulum

5. Membrane

6. Ribosome

7. Mitochondrion

8. Cytoplasm

a. Decompose cell's waste

b. Helps cells to selectively metabolize

c. Cell energy center

d. Synthesis: Protein

e. Information center, control cell activity

f. Synthetic place: protein, lipid. Metabolize: carbohydrate

g. Package, assemble, and distribute cell's products

h. Like jelly

3. Listen and choose
