

| Chemical Formula | Number of elements | Number of atoms of each element | Total Number of Atoms |
|------------------|--------------------|---------------------------------|-----------------------|
| $C_6H_{12}O_6$   |                    |                                 |                       |
| $2NH_4Cl$        |                    |                                 |                       |
| $3Zn(NO_3)_2$    |                    |                                 |                       |
| $4Mg(OH)_2$      |                    |                                 |                       |
