

Worksheet: The Animal Cell

Label the diagram by dragging the organelle name to the structure it matches.

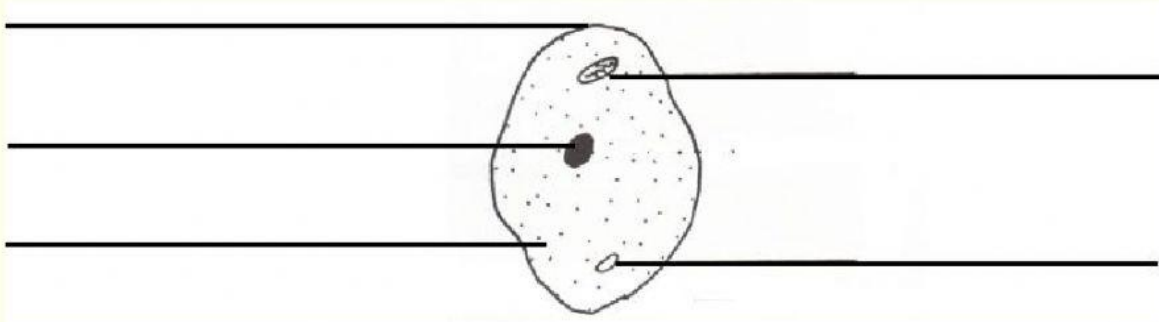

Cell Membrane

Cytoplasm

Mitochondria

Nucleus

Vacuole

Is the cell shown above a prokaryotic cell or a eukaryotic cell? _____

Give ONE reason to support your answer. _____

Name the instrument that must be used to see a cell. _____

Plants and animals are _____ organisms, but a bacteria or amoeba is a _____ organism.

For each function, choose from the drop down menu the cell organelle that best matches it.

- a. Controls the activities of the cell _____
- b. Gives the cell its shape _____
- c. This is where chemical reactions take places _____
- d. Is the powerhouse of the cell _____
- e. Controls what enters and leaves the cell _____
- f. Stores food, water or wastes for the cell _____
- g. This is where cellular respiration takes place _____
- h. Contains DNA or genetic information _____
- i. Jelly-like substance that fills the cell _____
- j. Produces energy for the cell _____
