

## Mathematics

Count the objects and match it with its number.

|                                                                                  |   |
|----------------------------------------------------------------------------------|---|
|  | 3 |
|----------------------------------------------------------------------------------|---|

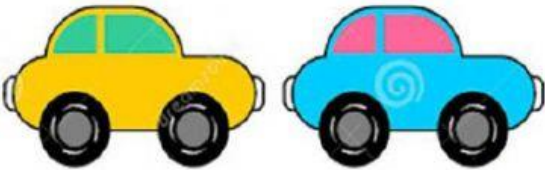

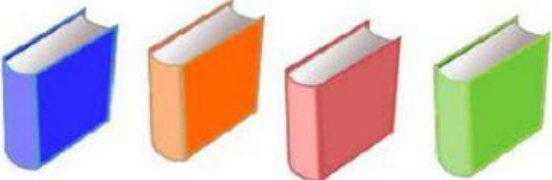

|                                                                                  |   |
|----------------------------------------------------------------------------------|---|
|  | 1 |
|----------------------------------------------------------------------------------|---|

|                                                                                     |   |
|-------------------------------------------------------------------------------------|---|
|  | 4 |
|-------------------------------------------------------------------------------------|---|

|                                                                                     |   |
|-------------------------------------------------------------------------------------|---|
|  | 5 |
|-------------------------------------------------------------------------------------|---|

|                                                                                    |   |
|------------------------------------------------------------------------------------|---|
|  | 2 |
|------------------------------------------------------------------------------------|---|

Put in the **set**, **word name** or **number** to complete the table below.

| SET                                                                                 | WORD NAME | NUMBER |
|-------------------------------------------------------------------------------------|-----------|--------|
|    | <hr/>     | 1      |
|    | two       |        |
|   | <hr/>     | <hr/>  |
|  | four      | <hr/>  |
|  | <hr/>     | 5      |
