

Going Digital: The Future of College Textbooks?

This is the VOA Special English Education Report.

The average college student in America spent an estimated seven dollars on textbooks last year. The National Association of College Stores reported more than five billion dollars in sales of textbooks and course materials.

Association spokesman Charles Schmidt says electronic textbooks now represent just two to **change** three percent of But he says that is expected to reach ten to fifteen percent by two thousand twelve.

interactive

Online versions are now available for many of the most popular college textbooks. E-textbooks can cost half the of a new print textbook. But students usually lose access after the end of the term. And the books cannot be placed on more than one device, so they are not to share.

hundred
