Language Tip – Using Connectives

When we describe a process, it is useful to use a variety of connecting words.

In the article: Use the correct connectives from the list below

1. the spike protein is injected into the patient
2. the vaccine enters cells, which then start to
produce the coronavirus spike protein.
3. the immune system produces antibodies and
activates killer T cells to destroy infected cells
4. if the patient encounters coronavirus again, the
antibodies and T cells are triggered to fight the virus

Subsequently First of all Lastly As a result

Connectives and Conjunctions:

First	And	Why	Last
Firstly	Then	Consequently	Finally
First of all	Afterwards	As a result	Lastly
To start with	Subsequently	Therefore	Ultimately
	Later	Hence
