Addition Story Problems

Task 1: Watch the video https://www.youtube.com/watch?v=4EmXBYH3WAM

Task 2: Read the word problems and calculate the answers.

Remember that **altogether, in all, more, total** and **sum** mean add.

Use your book to do your working out.

1. In January, there were **34,371** new born dragons. In February, another **61,428** dragons were born. How many dragons were born **altogether**?
2. The Iron Swords Company employed **62,134** men, but then the industry experienced an upsurge, and **3,986** men joined. How many men work at the Iron Swords Company now?
3. The dragon master trained **34,417** dragons; he trained another **4,556** dragons. How many dragons did he train **altogether**?
4. Merlin trained **82,016** dragons, Miss Peters trained **399** dragons and Mrs Durose trained **31,427** dragons. How many dragons did they train **altogether**?
5. Merlin was selling **63,004** dragon spikes a month, and **3,265** dragon teeth. How many spikes and teeth does he sell **altogether**?
6. Merlin rescued **4,143** dragons, Miss Peters rescued **29** dragons and Gandalf rescued a further **78,986** dragons. What is the sum of dragons rescued?
7. Eleanor polished the scales of **63,952** dragons on Wednesday, and George polished **86,326** on Thursday. How many more scales did George polish **altogether**?
