(a) At what time were the most cars in the car park?

A-\_\_\_\_\_ pm

(b) How many cars were in the car park at 11 am?

A-\_\_\_\_\_

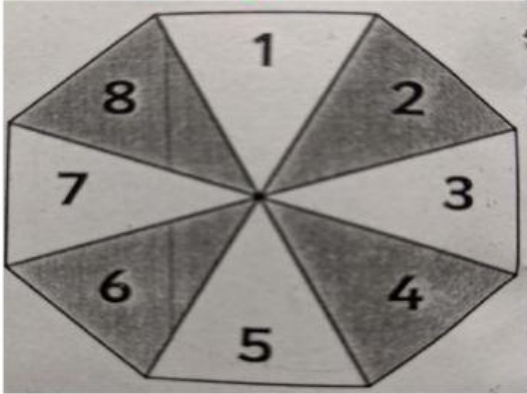

(c) How many fewer cars were in the car park at 3 pm than 1 pm?

A-\_\_\_\_\_

(d) At what time were there 24 cars in the car park?

A-\_\_\_\_\_pm

Q3. Yuri used a spinner shaped as a regular octagon. Write the probability he can spin each number. Use the correct language-( **impossible, unlikely, equal chance, likely, certain**) to answer the questions below

- a. A number less than 10 -
- b. A number 10 -
- c. An even number -
- d. The number 5 -

Q4. A dice rolled 9 times .

Here are the results

2 5 4 4 1 6 4 2 3

- a. What is the mode? A- \_\_\_\_\_
- b. What is the range of the results? A- \_\_\_\_\_
- c. What is the median of the results? A- \_\_\_\_\_

**Q5 What is the probability of**

**1. Rolling a six-sided dice and getting a 2?**

A- \_\_\_\_\_

**2. Rolling a six-sided dice and getting a number less than 4?**

A- \_\_\_\_\_

**3. Rolling a six-sided dice and getting a number over 2?**

**A-** \_\_\_\_\_

**4. Rolling a six-sided dice and getting a 1 or a 5?**

**A-** \_\_\_\_\_

**5. Rolling a six-sided dice and getting a 5?**

**A-** \_\_\_\_\_

**6. Rolling a six-sided dice and getting a prime number?**

**A-** \_\_\_\_\_

**7. Rolling a six-sided dice and getting an even number?**

**A-** \_\_\_\_\_
