LIVEWORKSHEETS

4- Read then answer the following questions:

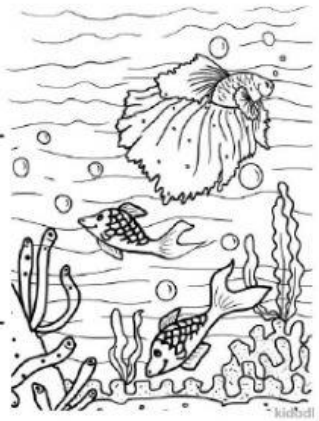

Most ocean animals can breathe underwater using gills. There are three zones in the ocean. Different animals are found in each zone. The top is the sunlight zone. This is where many plants and animals live here. The twilight zone has very little light and the water is cold. The midnight zone where few animals live.

a) What are the three levels of the ocean?

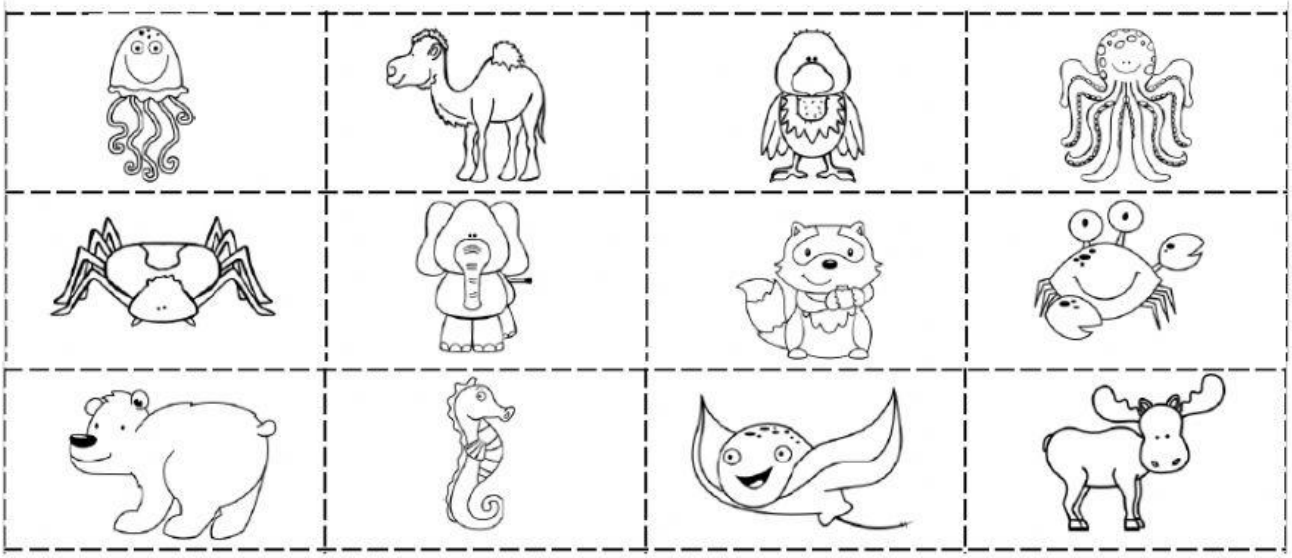

_____

b) How do animals breathe underwater?

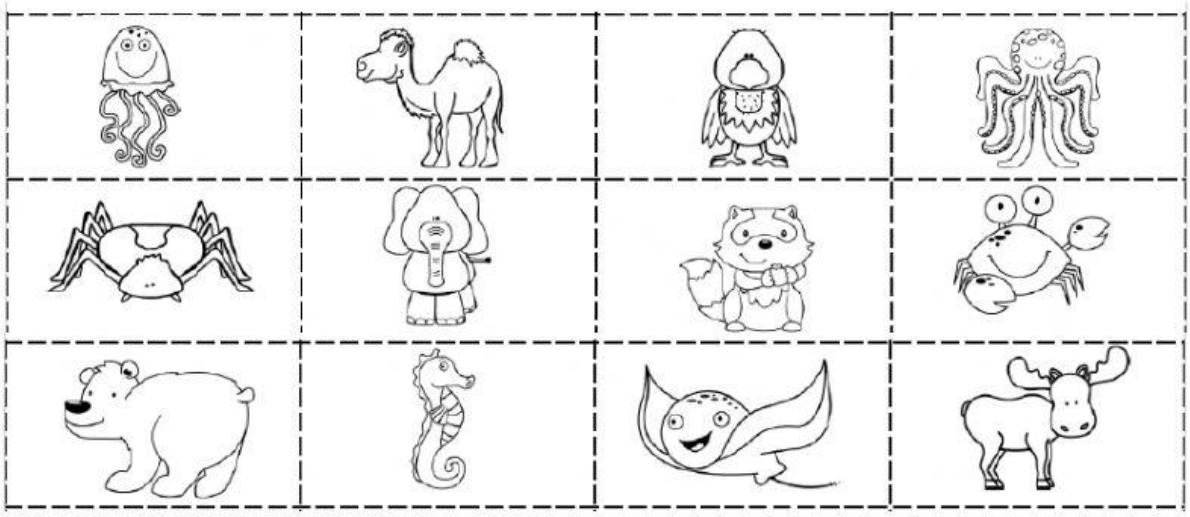

_____
