

1. Ieraksti trūkstošos vārdus definīcijās!

Par leņķa sinusu sauc attiecību pret

Par leņķa kosinusu sauc attiecību pret

Par leņķa tangensu sauc attiecību pret

2. Uzraksti atbilstošās trijstūra malu attiecības!

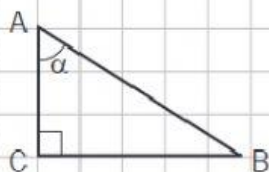

$\sin \alpha = \text{---}$ $\sin \beta = \text{---}$ $\sin \alpha = \text{---}$ $\sin \beta = \text{---}$

$\cos \alpha = \text{---}$ $\cos \beta = \text{---}$ $\cos \alpha = \text{---}$ $\cos \beta = \text{---}$

$\text{tg } \alpha = \text{---}$ $\text{tg } \beta = \text{---}$ $\text{tg } \alpha = \text{---}$ $\text{tg } \beta = \text{---}$

3. Nosaki trijstūra malu garumus!

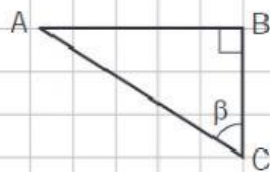

$$\sin \alpha = \frac{5}{7}$$

$CB = \text{---}$

$AB = \text{---}$

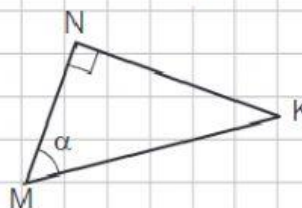

$$\cos \beta = \frac{3}{8}$$

$BC = \text{---}$

$AC = \text{---}$

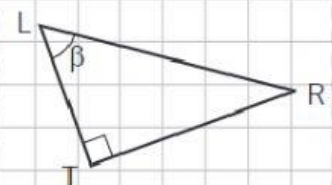

$$\text{tg } \alpha = \frac{7}{5}$$

$NK = \text{---}$

$MN = \text{---}$

$$\text{tg } \beta = 1\frac{2}{3}$$

$TR = \text{---}$

$LT = \text{---}$
