Most people know hip hop as a style of music but in fact hip hop is more than just the music. it is the words, the dance and generally a whole culture of young people who sing it, dance it and live it. It began its history in the Bronx are of New York City as early as the 1970s. But hip hop music did not start from nothing. Like all music, it had its beginnings in another kind of music. In the case of hip hop, this music is African American music, and some even say African music. Since the 1990s, hip hop has also become very popular in other parts of the world. For example, in Europe, Africa, and Asia it is the most popular style of music for teenagers. Hip hop has already been around for almost 40 years. Like rock and roll, it will probably be around for at least another 40 years.
