

UNIT 4. THE CLIMATE AND THE BIO-CLIMATIC ZONES.

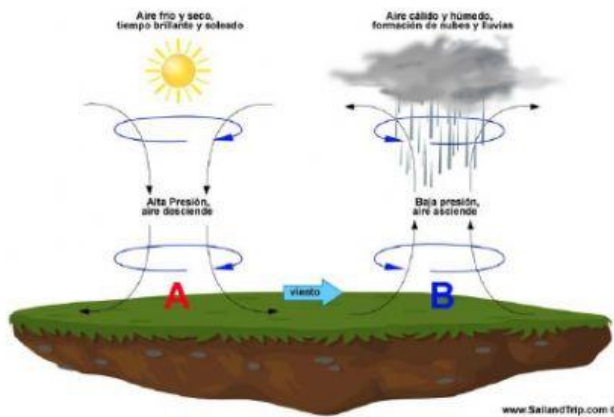

3. ELEMENTS OF CLIMATE. PRESSURE AND WIND.

ACTIVITY:

1. Match each keyword with its definition.

1. ATMOSPHERIC PRESSURE.

Atmospheric pressure measurement.

2. BAROMETER.

Weather maps represent pressure with...

3. MILLIBARS (mb)

The weight of the air in a particular place.

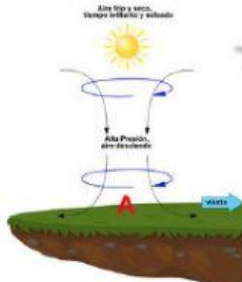

4. ISOBARS

Are areas with a higher average pressure. They are represented with an A on the weather maps and cause stable weather.

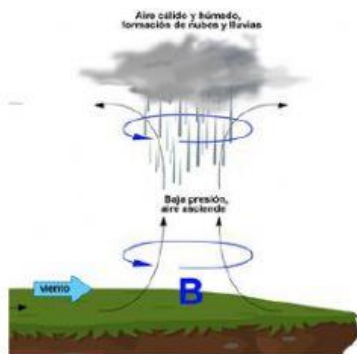

5. ANTICYCLONES

Instrument that measures atmospheric pressure expressed in millibars (mb).

1º ESO. GEOGRAFÍA E HISTORIA 2021/2022
6. DEPRESSIONS.

Are the contact surfaces between two air masses of different characteristics.

7. FRONTS

1

Cold front

2

Warm front

3

Occluded front

8. WIND

Is air in motion.

Areas of lower average pressure, they are represented with an B and they cause unstable weather.

Instrument that measures wind direction.

9. ANEMOMETER

10. WEATHER VANE

Instrument that measures wind speed.
