Reading Comprehension- Note Taking

Topic: Classification

What is Classification?

Classification is the putting or arranging of things into a group or category because of something that each share in common.

In other words, classification involves organizing/placing things into groups according to how they are related.

Classification always ask this question?

What is the similarity or sameness between this group of objects?

For example:

1. **Objects:** Nike, Puma, Adidas, Reebok

Classification (sameness): tennis shoes

2. **Objects:** Wendy's, Kentucky, McDonald's,

Classification (sameness): fast food restaurants

3. **Objects:** pants, skirt, blouse, shirt,

Classification (sameness): clothing
