

NATURAL SCIENCE LESSON

1. Drag and drop the correct Gland on the picture.

Thyroid gland

Ovaries in female

Thymus gland

Pineal gland

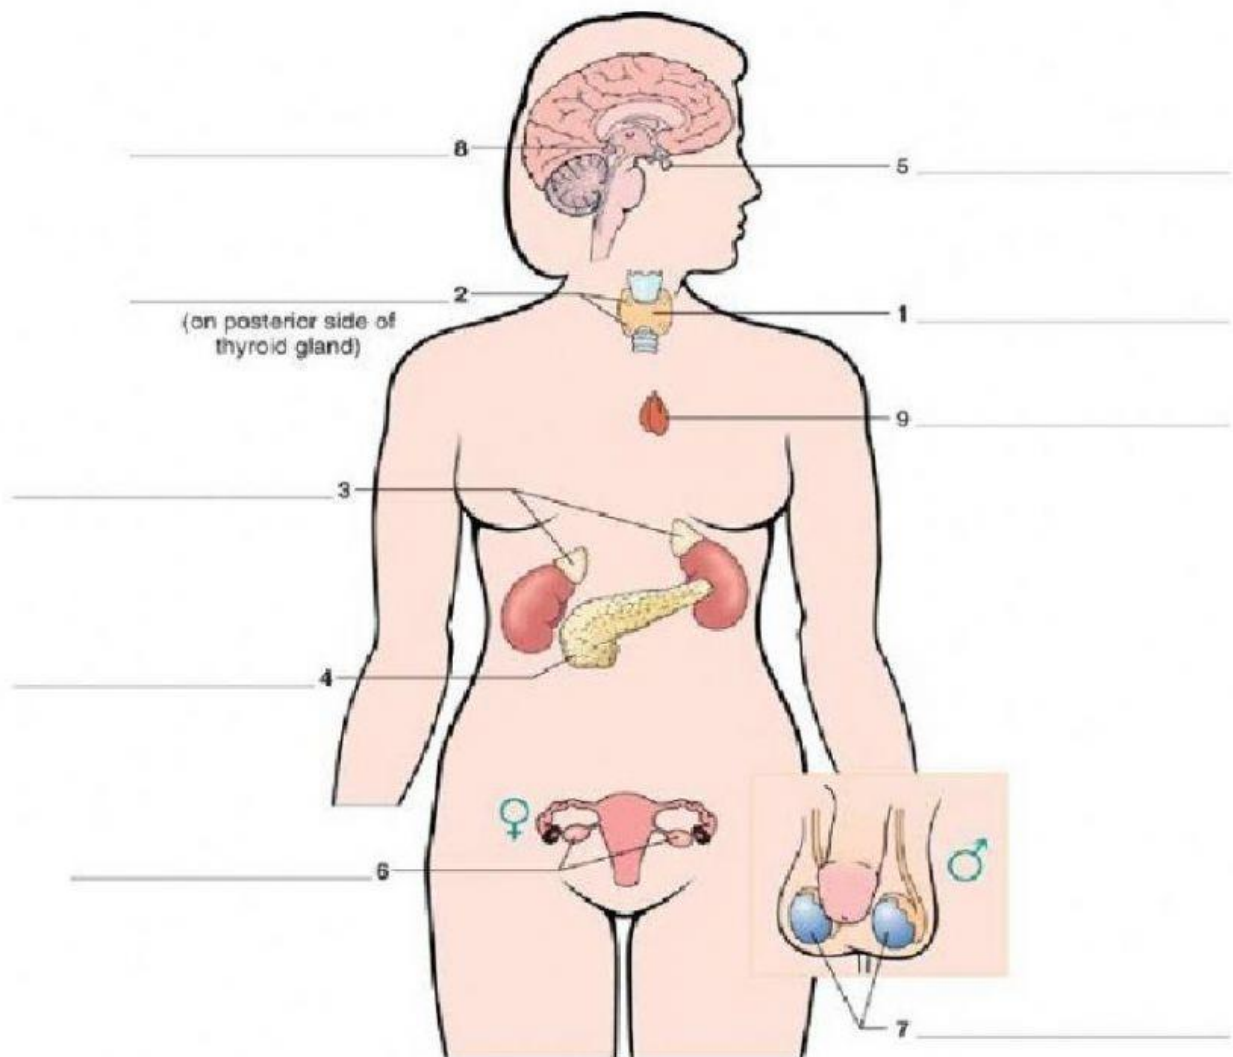

Pancreas (islets of Langerhans)

Pituitary gland

Parathyroid glands

Testes in male

Adrenal glands

2. Match the Endocrine Glands with the correct hormone.

Thyroid gland

Insulin

Pancrease

Adrenaline

Adrenal

Thyroxine

Testes

Growth Hormone

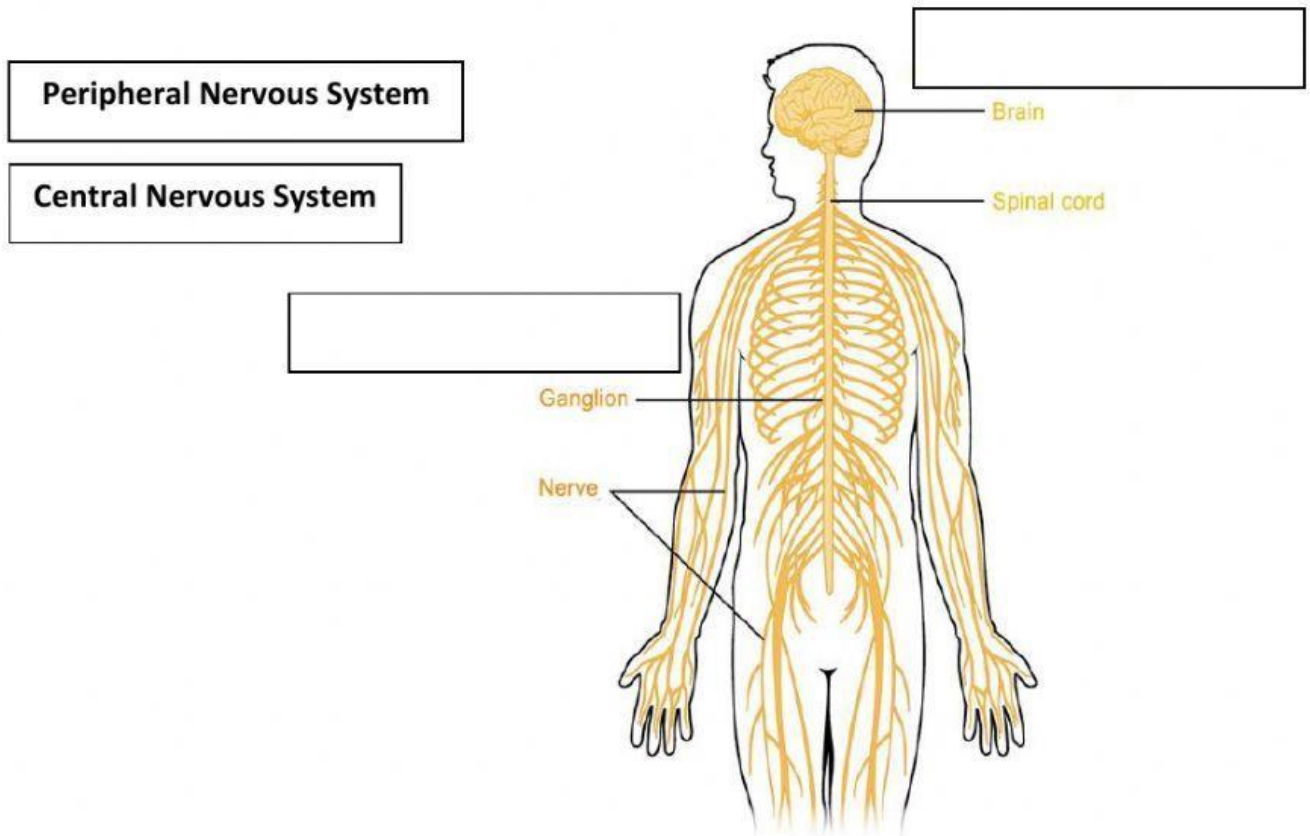

Ovaries

Progesterone

Pituitary

Testostero

3. Look at the picture. Then drag and drop the correct option on the picture.

4. Read the questions and choose the right answer.

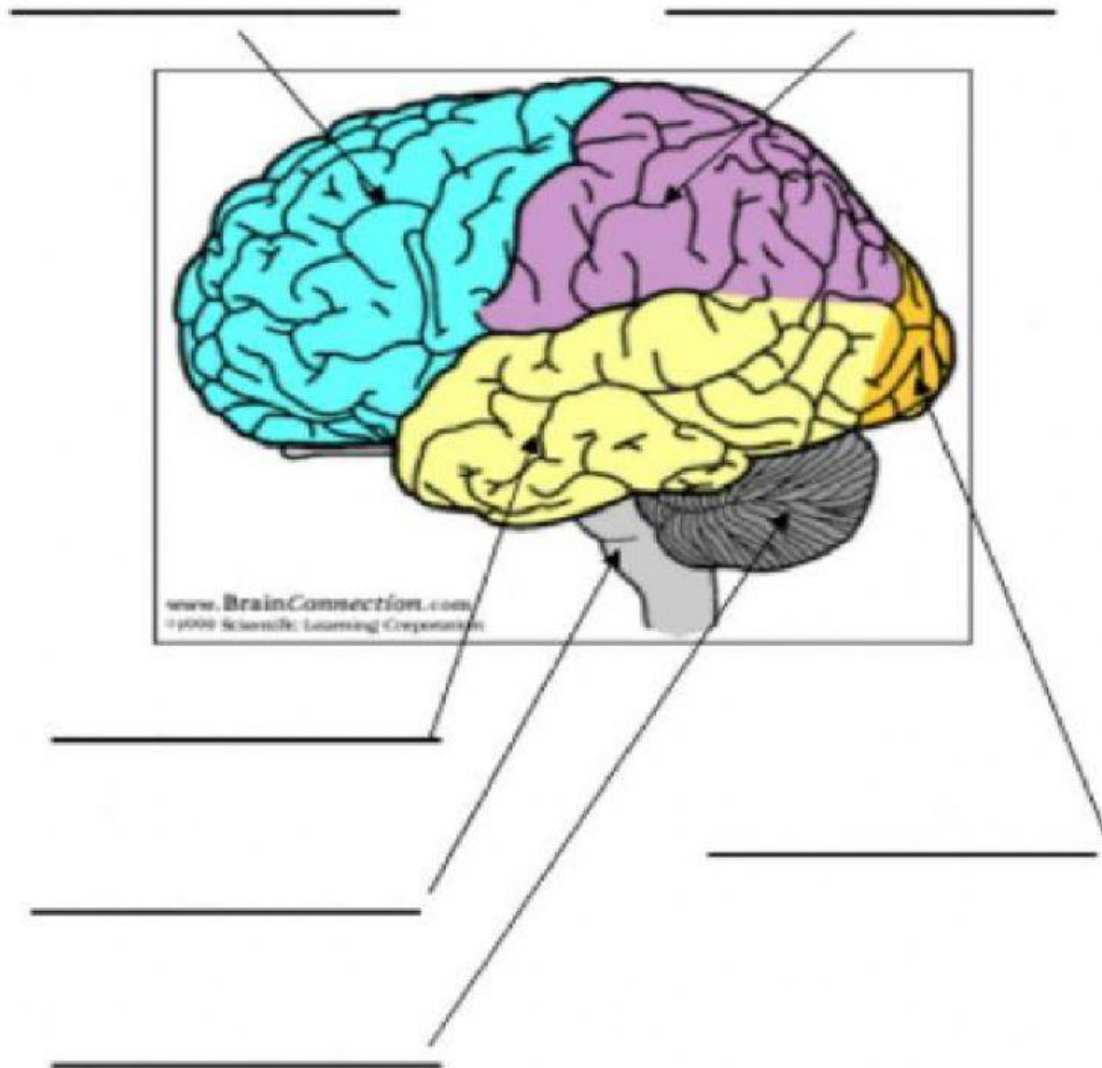

What are the three types of neurons?

- a. Motor, Impulses and Dendrite
- b. Sensory, Axon and Interneurons
- c. Sensory, Motor and Interneurons

What are the two major divisions of Human Nervous System?

- a. Somatic Nervous System and Auto Nervous System
- b. Central Nervous System and Peripheral Nervous System
- c. Spinal Cord and Sensory Division

5. Look at the picture. Then label the Brain.

Brain Stem

Parietal Lobe

Cerebellum

Occipital Lobe

Frontal Lobe

Temporal Lobe
