Finding the Area

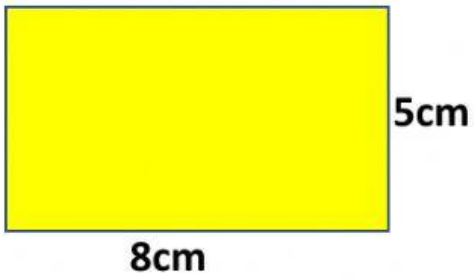

Area = length x height

Example:

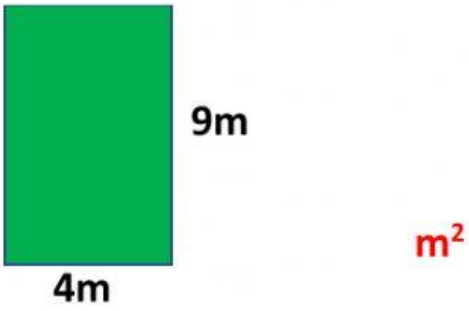

Area = length x height
Area = 10 x 5
Area = $50m^2$

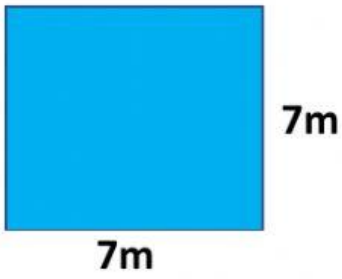

Try these:

cm^2

m^2

m^2

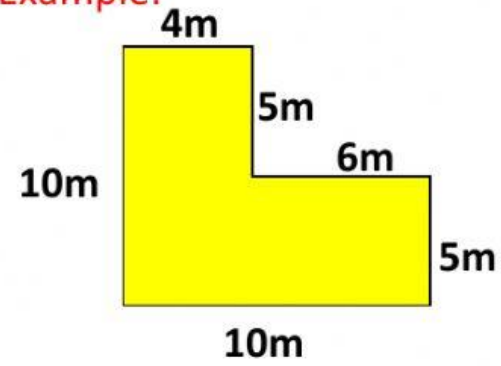

km^2

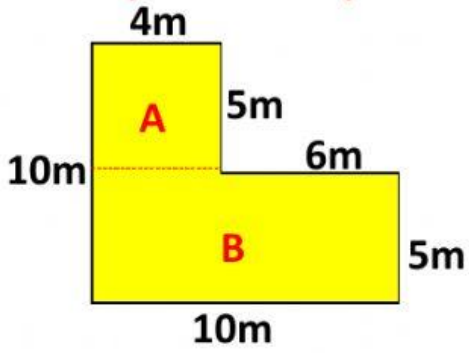

LIVEWORKSHEETS

Compound shape = A shape made up of 2 shapes together

Example:

We can split the compound shape into 2 easier shapes

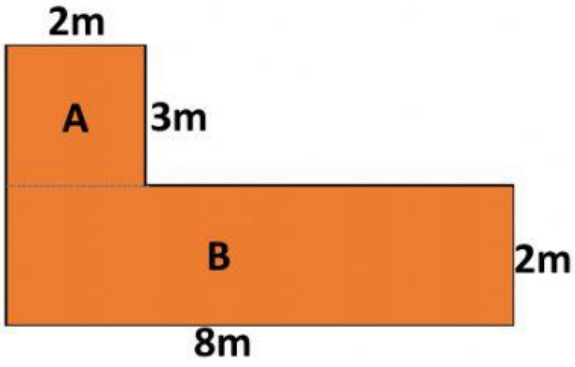

Shape A
Area = 5 x 4
Area = $20m^2$

Shape B
Area = 10 x 5
Area = $50m^2$

Total Area
Area = A + B
Area = 20 + 50
Area = $70m^2$

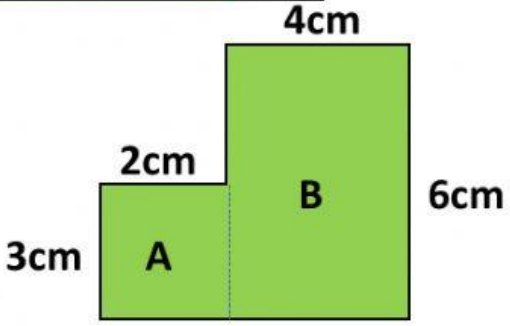

Have a go at these:

Shape A = m^2

Shape B = m^2

Total = m^2

Shape A = cm^2

Shape B = cm^2

Total = cm^2
