Reading

Sleep Better

Do you want to sleep better? Doctors say that these tips can help you:

You need to sleep eight to nine hours every night.

You should buy a good bed and pillow. If you have a comfortable bed and a good pillow*, you will sleep better.

Don't drink coffee in the afternoon or at night. It's okay to drink some coffee in the morning. But drinking coffee later in the day can make it hard for you to sleep at night.

Don't sleep a lot in the afternoon. Don't sleep more than fifteen or twenty minutes in the afternoon. If you sleep more, you will have problems to sleep at night.

Don't eat a lot at night. Eat a small meal at night, for example, salad or sandwich. Stop eating an hour before you go to bed.

Turn off your phone and computer. The light from your phone and computer is bad for sleep. Turn them off an hour before you go to sleep. Relax.

Before you go to sleep, take a bath, listen to quiet music, or read a calming* book. Don't think about your problems.

Remember! it is important to sleep well, but you also need to do sports and eat healthy food.

*pillow = כרית

*calming = מרגיע

*relax = להירגע

Answer

1. Who says that you sleep better with a good pillow?

2. What should you eat at night?

3. If you go to sleep at 11:00 **what time** should you stop eating?
