The second question in the test was.....

III. Fill in the blanks with the comparative form of the adjectives given in the box. You will have to use one adjective twice.

dangerous
fast

rare

small
strong

heavy
beautiful

long (X2)
tall

Lions and cheetahs are members of the cat family but they are very different. A lion is about 180 cm long but a cheetah is only about 120cm. So a lion is (1)..... than a cheetah. Lions are about 100cm tall but cheetahs are only about 70cm. So lions are (2).....too. Lions are also much (3)..... than cheetahs, weighing as much as 160kg each. The cheetah only weighs about 50kg. So the lions' bigger size makes them much (4)..... than cheetahs and (5)..... as they sometimes attack people. Lions live in "prides" of up to 30 animals, but cheetahs live in (6)..... groups of 2 or 4 animals. Lions live about two years (7)..... than cheetahs. But, as everyone knows, cheetahs are much (8)..... than lions. They can run up 100km an hour. Both animals are beautiful, but I think the cheetah is (9)..... than the lion because of its lovely spots. Sadly, both animals are becoming (10)..... as they are hunted and their homes destroyed.
