

Terrific T-Rex

9 The T-Rex was one of the largest and most powerful
16 meat-eating dinosaurs that has ever lived on our
26 planet. Standing up to a huge six metres tall and
36 at up to twelve metres long, the T-Rex moved
44 quickly with its strong and powerful thighs.
51 Their powerful jaws meant that they could eat
61 their prey in one bite. The T-Rex had quite a large
71 brain and this helped it to hunt better. The T-Rex
80 lived in the forests and river valleys of North
87 America before becoming extinct around sixty-
95 five millions years ago but nobody can agree for
103 sure why all dinosaurs suddenly became extinct
108 at this time.

Quick Questions

1. How tall can a T-Rex grow?

2. Why might a larger brain help a T-Rex to hunt better?

3. Find and copy two adjectives to describe a T-Rex's thighs.

4. Number these facts from 1 to 3 to show the order they appear in the text.

- ☐ The T-Rex is a meat-eating dinosaur.
- ☐ The T-Rex lived in North American forests.
- ☐ Dinosaurs suddenly became extinct.
