

Unit 5 Review

What is Earth made of?

Lesson 1

What are some kinds of land and water?

1 Look and match the words with their descriptions.

mountain

A large body of slow moving ice containing fresh water.

plain

A raised part of Earth's surface that is high and large.

lake

A large flat area of land that is ideal for farming.

glacier

An area of fresh water that is smaller than the ocean but bigger than a pond.

2 Circle one way glaciers and rivers are similar.

a) They move slowly.

b) They can flow into the ocean.

c) They have fresh water.

Lesson 2

How can people help protect Earth?

3 Look and mark (✓) the items that you can recycle in the bin shown.
