APRENDIZAJE EN CASA

I. Complete the table with the phrases below

carbon dioxide emissions/ carbon footprint / energy efficient / environmentally friendly
exhaust fumes/ fossil fuels/ global warming / greenhouse gases

Good for the planet	Bad for the planet
	<i>carbon dioxide emissions</i>

II. Choose the correct option to complete the text

We've just had a lesson on climate change at school. Mr Green explained how using forms of transport which produce a lot of

1 isn't environmentally friendly, and is causing 2 . Not only that, but 3 in cities are causing a lot of ill-health in the population. But he said things were getting better. Cars are becoming much more energy efficient, and electric cars are becoming more popular. They use less 4 – and the electricity they use is increasingly being produced by 5 in the form of 6 . So it's not all bad news!
