

THE PLANET SONG

- I. First, order the paragraphs as you believe they go. Then, check by listening to the song.

My name is Venus I'm the hottest planet
But the second planet from the sun
I'm the brightest planet in our solar system
And I'm too hot for anyone

My name is Mercury
I'm the second hottest planet
The closest one to the sun
A year on my surface is 88 days
I'm the smallest but I'm lots of fun

There are eight planets in our solar system
We all revolve around the sun
Learn about the different planets
Now sing along and have some fun

My name is Mars
I am red in color
The fourth planet from the sun
I have the highest mountain in our solar system
A volcano named Olympus Mons

My name is Earth
I'm the planet you live on
The Third Planet from the sun
I'm the only planet with organic life
So, take care of me because we're all one

There are eight planets in our solar system
We all revolve around the sun
Learn about the different planets
Now sing along and have some fun!

- II. What happened? Some words disappeared! Listen to the second part of the song and put the words in their correct place.

My name is I am covered in clouds

I'm the fifth from the sun

planet

Jupiter

My giant red spot is a raging

biggest

storm

As for size, I'm the one

My name is I am in color

I'm the sixth from the sun

Saturn

rings

My outer are extremely thin

brown

planet

They're made of dust and icy chunks

My names I am blue in color

I'm the planet from the sun

coldest

Humans have named me the planet

icy

Because I am the one

Uranus

seventh

My name is I am in color

I'm the eighth planet from the sun

furthest

blue

I have too many in my atmosphere

storms

Neptune

And I'm the planet from the sun

There are eight planets in our solar system

We all revolve around the sun

Learn about the different planets

Now sing along and have some fun

III. Now, write the names of the planets.
