INTONATION PATTERNS

Intonation and stress are closely linked. In fact, it's impossible to dissociate them. Intonation is about how we say things, rather than what we say, the way the voice rises and falls when speaking, in other words the music of the language. There are two basic patterns of intonation in English: falling intonation and rising intonation.

Instruction:

- Determine the Intonation Pattern we are using.
- Listen to the audios and write the type of intonation they represent. Take your time. Repeat the audio if you need to. When you're done, submit your answers.

Options:

- Closed choice alternative questions
- Open choice alternative questions
- Tag question uncertainty
- Tag question certainty
- Series
- Appositive

LIVEWORKSHEETS

TASK

1. Your headphones were expensive, weren't they?
