

**Part 1: Label the diagram**

**Part 2: Drag the statement to correct keyword**

A cell with the full number of chromosomes	A cell with half the number of chromosomes	A special process that makes haploid cells
A section of DNA that makes a protein	A sex cell	When an egg and sperm cell join

<input type="text"/>	Meiosis	<input type="text"/>	Haploid
<input type="text"/>	Gene	<input type="text"/>	Fertilization
<input type="text"/>	Diploid	<input type="text"/>	Gamete

**Part 3 – Match the correct number to the cell type**

46 chromosomes in human cell	Haploid cell
23 chromosomes in human cell	Diploid Cell
