

OPERACIONS COMBINADES

Per resoldre operacions combinades primer es resolten les multiplicacions i després les sumes i les restes.

$$6 \times 3 + 2$$

$$18 + 2 = 20$$

$$6 + 3 \times 2$$

$$6 + 6 = 12$$

$$9 \times 3 + 5 =$$

$$\boxed{} + \boxed{} = \underline{\hspace{2cm}}$$

$$12 + 4 \times 2 =$$

$$\boxed{} + \boxed{} = \underline{\hspace{2cm}}$$

$$5 \times 5 - 5 =$$

$$\boxed{} - \boxed{} = \underline{\hspace{2cm}}$$

$$40 - 5 \times 4 =$$

$$\boxed{} - \boxed{} = \underline{\hspace{2cm}}$$

$$3 \times 4 + 9 =$$

$$\boxed{} + \boxed{} = \underline{\hspace{2cm}}$$

$$10 + 7 \times 2 =$$

$$\boxed{} + \boxed{} = \underline{\hspace{2cm}}$$

$$8 \times 2 - 10 =$$

$$\boxed{} - \boxed{} = \underline{\hspace{2cm}}$$

$$55 - 5 \times 7 =$$

$$\boxed{} - \boxed{} = \underline{\hspace{2cm}}$$
