

Multiply. Write your answers as improper fractions first, then change to mixed numbers.

1. $10 * \frac{2}{5} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2. $3 * \frac{5}{6} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3. $9 * \frac{4}{9} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4. $7 * \frac{3}{4} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

5. $6 * \frac{3}{4} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

6. $7 * \frac{5}{8} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

7. $13 * \frac{5}{8} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

8. $14 * \frac{7}{10} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

9. $7 * \frac{14}{100} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

10. Mrs. Smith bought some orange juice. Each member of her family drank $\frac{2}{3}$ cup for breakfast. There are five people in her family. How many cups of orange juice did they drink?

Improper Fraction = Mixed Number =
