

**6<sup>th</sup> Grade**  
**Pg. 99 (3-8)**

In 3–8, solve each equation and check your answer.

3.  $g - 8 = 25$

$$\begin{array}{l} \boxed{\phantom{0}} = \boxed{\phantom{0}} + \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$

4.  $25 + y = 42$

$$\begin{array}{l} \boxed{\phantom{0}} = \boxed{\phantom{0}} - \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$

5.  $r + 82 = 97$

$$\begin{array}{l} \boxed{\phantom{0}} = \boxed{\phantom{0}} - \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$

6.  $30 = m - 18$

$$\begin{array}{l} \boxed{\phantom{0}} + \boxed{\phantom{0}} = \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$

7.  $150 = e + 42$

$$\begin{array}{l} \boxed{\phantom{0}} - \boxed{\phantom{0}} = \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$

8.  $a - 51 = 12$

$$\begin{array}{l} \boxed{\phantom{0}} = \boxed{\phantom{0}} + \boxed{\phantom{0}} \\ \boxed{\phantom{0}} = \boxed{\phantom{0}} \end{array}$$
