

Oh, doctor! What should I do? use should/ shouldn't

She lose some weight to fight her obesity

He go to work with his fracture

Sam avoid being in public with his runny nose

Kate take aspirin to cure her headache

John change his old bed mattress for his back

Your dad forget his inhaler with his asthma

You use sun screen not to get sunburnt

She take some syrup for her cough

With that earache you listen to loud music

Your mum check her blood pressure more often

If you have a bad eyesight you have an eye test

With such a high fever you go outside

You eat chewing gum with your braces

Your teacher speak with his sore throat

If you don't feel better, you go to the doctor's

With your diabetes you take care of your sugar level

You disinfect this cut

You go jogging with your sprain

You stay at home because you're having flu

You take pills without any serious reason

With that stomach ache you eat so much!

You keep a cat, because you're allergic to them

You take pills as you're feeling sick

You go to the dentist's with that toothache

You stop smoking if you don't want to have lungs problem
