

Perimeter and Area of Triangles

Instruction: Find the area and perimeter of the triangles.

$$\text{Area} = \frac{1}{2}(\text{base} \times \text{height})$$

$$\begin{array}{l} P = ? \text{ ft} \\ A = ? \text{ ft}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{ft} \\ \text{ft}^2 \end{array}$$

$$\begin{array}{l} P = ? \text{ cm} \\ A = ? \text{ cm}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{ft} \\ \text{ft}^2 \end{array}$$

$$\begin{array}{l} P = ? \text{ mi} \\ A = ? \text{ mi}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{mi} \\ \text{mi}^2 \end{array}$$

$$\begin{array}{l} P = ? \text{ cm} \\ A = ? \text{ cm}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{cm} \\ \text{cm}^2 \end{array}$$

$$\begin{array}{l} P = ? \text{ AU} \\ A = ? \text{ AU}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{AU} \\ \text{AU}^2 \end{array}$$

$$\begin{array}{l} P = ? \text{ yd} \\ A = ? \text{ yd}^2 \end{array} \quad \begin{array}{l} P = \\ A = \end{array} \quad \begin{array}{l} \text{yd} \\ \text{yd}^2 \end{array}$$
