To figure out the difference in length between two objects,
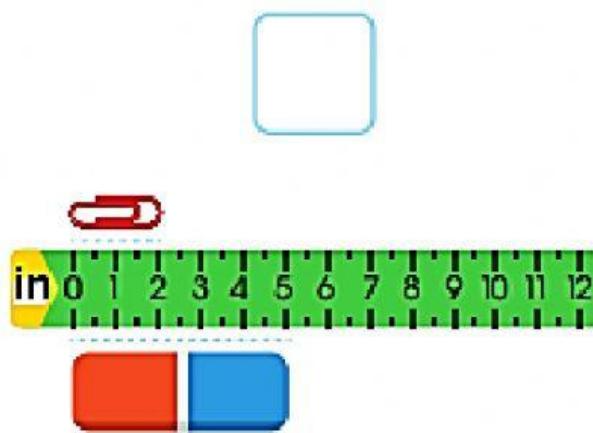

1. measure both objects in the same unit of measurement.

in 0 1 2 3 4 5 6 7 8 9 10   in 0 1 2 3 4 5 6 7 8 9 10

2. subtract the length of the shorter object from the length of the longer one.

$$5 - 3 = 2$$

In each pair of objects check the longer object.
Then circle the correct difference in length between the two objects.

in 0 1 2 3 4 5 6 7 8 9 10 11 12   in 0 1 2 3 4 5 6 7 8 9 10 11 12

3 **7** **2**   **21** **4** **9**
