

Division Using Grouping

Division means to share, to divide, to split to put into equal groups or sets.

Using equal groups

$$12 \div 3 = 4$$

Dividend
total
number of
objects

Divisor
number in
each
group

Quotient
number of
equal
groups

Drag and drop the objects to create groups to help you divide.

1. $13 \div 2 = \underline{\quad}$

2. $9 \div 4 = \underline{\quad}$

3. $15 \div 6 = \underline{\quad}$

4. Divide into groups of 2.

$$\square \div \square = \square$$

5. Divide into groups of 5.

$$\square \div \square = \square$$

6. Divide into groups of 3.

$$\square \div \square = \square$$
