

MUSEUMS IN LONDON

A Walk into Earth's Wild Past

No trip to London is complete without a visit to the Natural History Museum (NHM). This huge museum, with over 80 million exhibits, wants to do one thing: teach the world about Biology. Visitors to the museum can see giant dinosaurs, examples of what humans looked like in the past and other exhibits from the natural world. You can't touch many of the exhibits, but the scientists who work in the museum will show you if you ask. At night, the museum comes alive with its own cinema and night time shows. Why not visit today?

SEE THE FUTURE

Visit London's Science Museum and see the future come alive! The museum shows the latest achievements in Physics, Chemistry and Engineering and holds over 15,000 exhibits. It's got exhibits from the history of science, like the first train, to modern technology, like VR headsets and robots. What's more, visitors can play with real-life experiments, try to recreate when the universe began or even watch films on a huge 3D cinema screen as tall as four double-decker buses! Visit today, you'll have the time of your life!

1 ★ Read the texts and decide if the sentences 1-4 are **R (right)**, **W (wrong)** or **DS (doesn't say)**.

1 The Natural History Museum closes in the evening.

R **W** **DS**

2 Scientists work in the Natural History Museum.

R **W** **DS**

3 The Science Museum has more exhibits than the NHM.

R **W** **DS**

4 The cinema in the Science Museum is bigger than the one in NHM.

R **W** **DS**

2 ★★ Read the texts and choose the museum, (S) for Science Museum or (N) for Natural History Museum which matches each sentence.

1 You can learn how to do experiments here.

S **N**

2 You are not allowed to touch a lot of the exhibits here.

S **N**

3 You can experience virtual reality here.

S **N**

4 You can learn about where humans came from here.

S **N**

3 ★★★ Read the texts and for statements 1-4, choose the best answer (A, B or C).

- 1 The Natural History Museum teaches us about
 A Chemistry. B Physics. C Biology.
- 2 In the evening, the Natural History Museum
 A closes. B shows films. C lets people touch exhibits.
- 3 Visitors to the Science Museum can learn about the history of
 A the universe. B dinosaurs. C cinema.
- 4 The cinema in the Science Museum has the height of four
 A trains. B buses. C robots.

3 CLIL (Music)

1 Look at the pictures of the musical instruments. Listen and repeat.

2 Read the text. Which type of musical instrument:

WOODWIND

STRING

BRASS

PERCUSSION

- 1 keeps the rhythm?
- 2 sometimes needs a bow to play it?
- 3 sometimes looks like a pipe with holes?
- 4 do you play by vibrating your lips?

Match the sentences 1-8 with the categories of musical instruments by ticking the correct box.

	percussion	woodwind	brass	string
1 A clarinet is in this category.		☒		
2 You can use a bow.				
3 It's got fingerholes or keys.				
4 The trombone is in this category.				
5 The violin is one of these.				
6 You can make different sounds by sliding part of it.				
7 The xylophone is in this category.				
8 You can play some of these instruments by shaking them.				

Name the musical instruments.
