

I. TRUE or FALSE. Write TRUE if the statement is true and FALSE if the statement is false.

- _____ 1. Invertebrates are animals that don't have a backbone.
- _____ 2. Other invertebrates, like insects, spiders and crustaceans, have a hard outer casing called an exoskeleton.
- _____ 3. Vertebrates are animals that have a backbone inside their body.
- _____ 4. The major groups of vertebrates include fish, amphibians, reptiles, birds and mammals.
- _____ 5. The skeleton consists of a backbone (vertebral column), which partly encloses a spinal cord; a skull, which encloses the brain; and usually two pairs of limbs.
- _____ 6. Skin and scales, feathers, fur, or hair cover the outer surface of a vertebrate.
- _____ 7. Invertebrates can live on land—like insects, spiders, and worms—or in water.
- _____ 8. Many invertebrate animals have a hard shell outside their bodies to protect them.
- _____ 9. Invertebrates are warm blooded animals.
- _____ 10. Vertebrates have an internal skeleton formed of cartilage, bone, or both.

II. Identify the following animals. Write invertebrate or vertebrate.

1.

2.

3.

4.

5.

6.

7.

8.
