

Human beings are living things

You are a living thing too. What different parts make up your body? How does each part of your body help you to carry out daily activities?

Parts of your body

Sci-notes

Paste a photograph or draw a picture of yourself in your science journal. Label the different parts of your body.

Your sense organs

Your **sense organs** are special parts of your body that help you sense the world around you.

Your sense organs are your:

- eyes
- ears
- nose
- tongue
- skin

Your sense organs collect information about the world around you. This information is sent to your brain.

▶ ▲ wall thermometer

▶ Your sense organs are very useful to you. They help you to learn about the world around you. However, at times we have to use instruments when we need to observe or measure things more accurately.

Different instruments help us to observe and measure different things. Thermometers can be used to measure temperature accurately.

▶ ▲ digital thermometer

▶ ▲ clinical thermometer

Watches and timers can be used to measure time.

▶ ▲ egg timer

▶ ▲ stopwatch

▶ ▲ watch

Rulers and tape measures can be used to measure length.

▶ ▲ ruler

▶ ▲ tape measure

Beakers, measuring cylinders and measuring cups can be used to measure volume.

▶ ▲ measuring spoons

▶ ▲ glass containers for measuring volume
