Division of Laguna  
District of San Pedro  
San Pedro Central School  
Q2 W 3-4 SUMMATIVE TEST  
Science-Five

Name: \_\_\_\_\_  
Teacher: \_\_\_\_\_

- I. Identify the following. Write your answer on the space provided before the number.
- \_\_\_\_\_ 1. It is monthly discharge of blood from the uterus through vagina.
  - \_\_\_\_\_ 2. It occurs when a sperm cell unites with an egg cell.
  - \_\_\_\_\_ 3. When the sperm cell enters the egg cell, the egg gets fertilized and is now called \_\_\_\_\_.
  - \_\_\_\_\_ 4. The zygote divides into cells and develops into an \_\_\_\_\_.
  - \_\_\_\_\_ 5. The mode of reproduction where cells from only one parent are used and no reproductive organs are involved.
  - \_\_\_\_\_ 6. It is the union of two nuclei from special sex cell involved.
  - \_\_\_\_\_ 7. Mode of sexual reproduction where the parents' organism splits into two equal parts.
  - \_\_\_\_\_ 8. Ability of an organism to re grow lost body parts
  - \_\_\_\_\_ 9. It happens when a new animal develops from a detached body part of the parents' animals.
  - \_\_\_\_\_ 10. Ability of living things to copies of itself.

Choose **T** if the statement is true and **F** if the statement is false.

- |   |   |  |
|---|---|--|
| T | f | 11. Sexual reproduction is making copy of the organism with a single parent.                           |
| T | f | 12. Some tiny animals and marine animals like sea anemone reproduce by binary fission.                 |
| T | f | 13. Reproduction is ability of living organism to make copy of itself.                                 |
| T | f | 14. Hydras reproduce themselves through the process of budding.  |
| T | f | 15. When the worm id cut into different segments, it undergoes budding.                                |
| T | f | 16. Budding happens when the parent organism divides itself into two.                                  |
| T | f | 17. When a frog loses its leg, it can regenerate its own leg.  |
| T | f | 18. Regeneration happens when another organism is produced from the outgrowth of the parents organism. |

T            f            19. Fission happens when an organism develops from a detached part of the parent organism.

T            f            20. When a starfish loses its arm, its detached arm undergoes asexual reproduction called regeneration.

\_\_\_\_\_ 21. \_\_\_\_\_ 22. Two types of Animal reproduction

\_\_\_\_\_ 23. \_\_\_\_\_ 24. Two types of fertilization

\_\_\_\_\_ 25. Specialized organs of the animals
