Click on True or False

1. School Teacher can be considered as System user of a computer

True

False

2. ICT teacher in a school can be considered as a End user.

True

False

3. Students who are follow a computer programs can be considered as computer programmers

True

False

4. Person who develop computer software and program are called System administrators

True

False

5. Learning Management System is a system used by only teachers and students to engage classroom activities

True

False

6. Automated time table creating system in a school can be considered as end user system

True

False

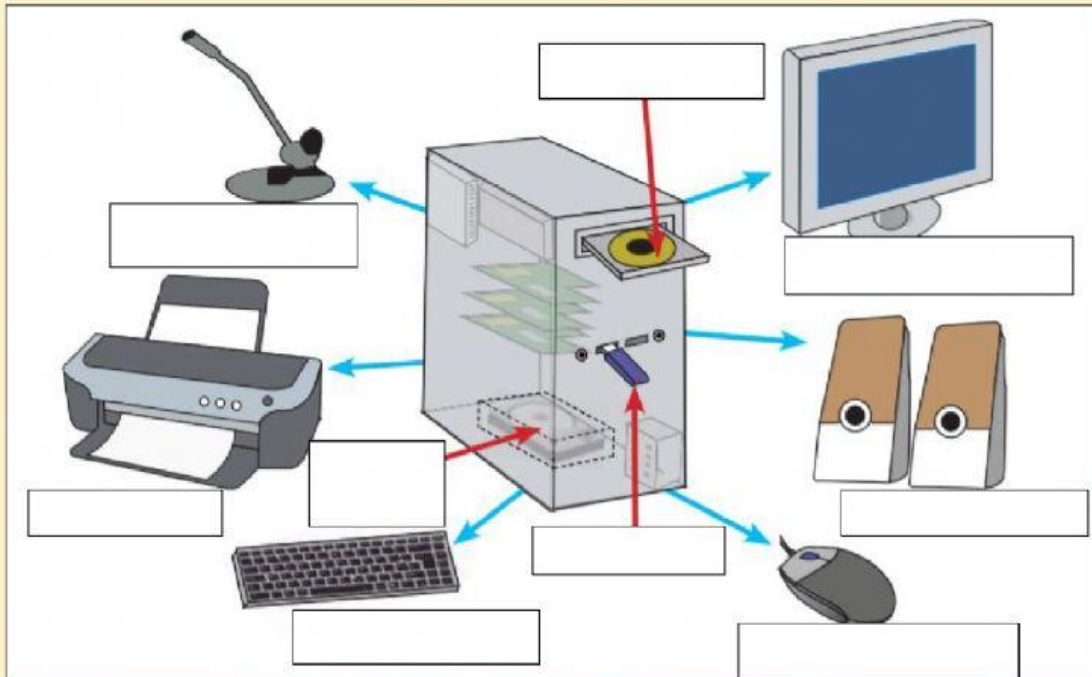

1. Which one of the following can be considered as information

- i. Name list in a classroom
- ii. Age of students
- iii. Average marks of subjects
- iv. Email address

2. Which of the following is correct regarding the functions of computer,

- i. Only Collecting data
- ii. Only Collecting and Saving data
- iii. Only Saving and Display data
- iv. Doing a task according to user instructions

Computer peripheral devices

Mouse

Printer

Optical disk

Microphone

Speakers

Flash drive

Keyboard

Monitor

Hard disk drive

01 Which of the following is a computer hardware,

- i. MS-Office
- ii. Google chrome
- iii. Windows 10
- iv. Display Unit

02 Which combination is correct regarding computer software,

- i. Power point/Excel/Keyboard
- ii. Excel/Access/Mouse
- iii. Word/Excel/Power point
- iv. Word/Mouse/Excel

1. Intangible parts of the computer can be considered as computer hardware

True

False

2. We need to install computer software to work with computers

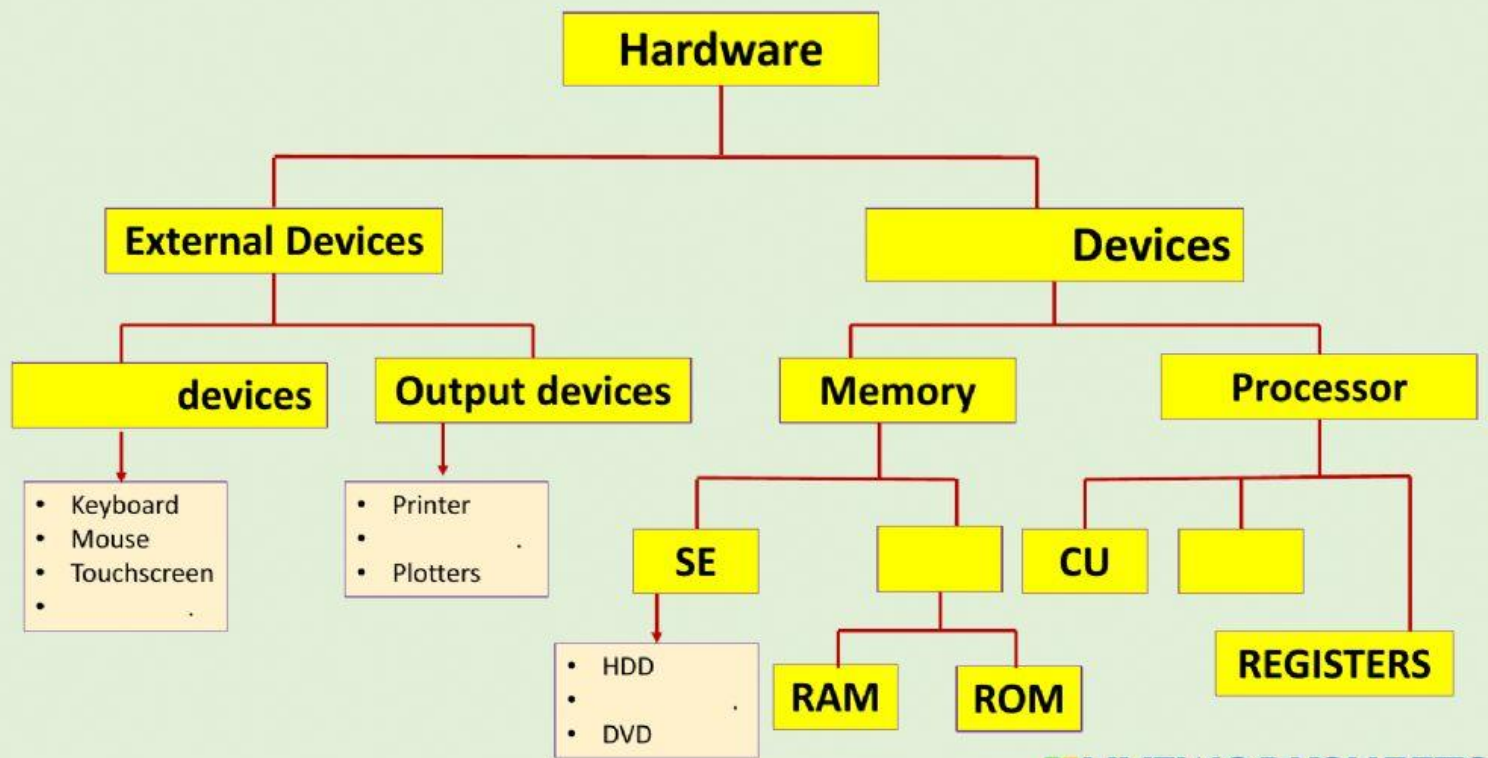

True

False

3. Flash drive is a device that used to move computer software

True

False

Match the device in right side with the text in left side

Touch screen

Microphone

OMR

Joystick

Keyboard

Barcode reader

Webcam

Type your lesson plan

Consider as both input and output device

Useful in MCQ marking

Record your sound

Useful in Online classes

Automated data input method

Device to handle human movements
