

Name _____

Date _____

Year Group _____

Use the following matrices to answer the questions below

$$A. \begin{bmatrix} 3 & 6 \\ -4 & 2 \end{bmatrix} \quad B. \begin{bmatrix} -2 & 7 \\ 5 & 4 \end{bmatrix}$$

1. Write down the first steps for $A \times B$.

$$\text{Answer} = \begin{bmatrix} _ * _ + _ * _ & _ * _ + _ * _ \\ _ * _ + _ * _ & _ * _ + _ * _ \end{bmatrix}$$

2. What is the result for $A \times B$?

$$\text{Answer} = \begin{bmatrix} _ & _ \\ _ & _ \end{bmatrix}$$

3. What is the result of $B \times A$?

$$\text{Answer} = \begin{bmatrix} _ & _ \\ _ & _ \end{bmatrix}$$

4. What is the result of $A \times A$?

$$\text{Answer} = \begin{bmatrix} _ & _ \\ _ & _ \end{bmatrix}$$

Find the missing elements given the matrices below

$$A. \begin{bmatrix} 2 & _ \\ -3 & 4 \end{bmatrix} \quad B. \begin{bmatrix} -6 & 3 \\ 4 & _ \end{bmatrix}$$

5. Find the missing elements so that $A \times B = \begin{bmatrix} 8 & 16 \\ 34 & -1 \end{bmatrix}$

$$\text{Answer} = A. \begin{bmatrix} 2 & _ \\ -3 & 4 \end{bmatrix} B. \begin{bmatrix} -6 & 3 \\ 4 & _ \end{bmatrix}$$
