3. Read and choose True or False

Animals use camouflage to hide and stay safe. Camouflage means that the colours and patterns on an animal's body are the same as the colours and patterns of the place where the animal is hiding. If the camouflaged animal does not move, it is hard for other animals to see it. Camouflage is a good way for small animals to hide from larger animals who want to eat them. Animals who want to eat other animals also use camouflage.
