stages

The process is a method for breaking down large project into stages. The design process is used by designers, engineers, architects, and scientists whenever they face a problem such as a design task. The in the design process are:

- ① Design problem or brief
- ② the problem
- ③ Research and planning
- ④ Design possible and final solutions
- ⑤ Produce the final product
- ⑥ and evaluate the product

There are many processes used for design and project development. Some other methods are

- ① Design thinking process
- ② Systems lifecycle
- ③ Agile development
