The one I love most is my mother. She is tall and rather thin. She is a warm kindly person with an oval face and a long black hair. My mother loves us very much. She usually stays up late and gets up early to earn money and take care of us. In my house, I close to my mum best. I always talk to her about daily routine and share everything with her. After school, I usually help my mum do housework. In our free time, we often go swimming together. At the weekends, we often visit our grandparents. She is strict thanks to that we are educated into a good person. I will try to study well to satisfy my mother.
