

## Nervous System

Assalamualaikum... Can you help me to name the different parts in the nervous system?

Next, can you help me to fill in the blanks with the correct word?

The \_\_\_\_\_ is the main organ in the nervous system. It is protected by the \_\_\_\_\_. The \_\_\_\_\_ are spread all over our body connected to our sense organs. The nerves then send the messages that it gets from our \_\_\_\_\_ senses and send it to the \_\_\_\_\_ and then from there it goes to our brain. Our brain will decide what to do with the messages and send it to the correct parts of our body.
