G6E2-Lesson 7.1

Check

A grocery store charges $2.50 per gallon of fruit punch. The total cost c of g gallons of fruit punch is equal to 2.5 times g. The rule is $2.5g$. Make a table using the rule to find the total cost of buying 1, 2, or 3 gallons of fruit punch.

Input Number of Gallons, g	Rule $2.5g$	Output Total Cost ($), c
