

Rounding Fractions

Use these rules to round Fractions

When the numerator is:	Round to:
much less than the denominator	0
about $\frac{1}{2}$ the denominator	$\frac{1}{2}$
about the same as the denominator	1

Use benchmark fractions such as 0, $\frac{1}{2}$, or 1 to round off the given fractions.

Select the correct bench mark fraction that each given fraction should round off to.

A Number line can make it easy to decide which benchmark fraction it is closet to

Fraction	Benchmark fraction		
$\frac{3}{5}$	0	$\frac{1}{2}$	1
$\frac{6}{12}$	0	$\frac{1}{2}$	1
$\frac{2}{12}$	0	$\frac{1}{2}$	1
$\frac{1}{8}$	0	$\frac{1}{2}$	1
$\frac{4}{5}$	0	$\frac{1}{2}$	1
$\frac{11}{13}$	0	$\frac{1}{2}$	1
$\frac{3}{7}$	0	$\frac{1}{2}$	1
