A _____ report says scientists are 95% certain that humans are the "dominant _____" of global warming since the 1950s. The report by the UN's climate panel details the physical _____ behind climate change. On the ground, in the air, in the oceans, global warming is "_____", it explained. The panel warns that continued _____ of greenhouse gases will cause further warming and changes in all aspects of the climate system. To contain these changes will require "substantial and sustained _____ of greenhouse gas emissions".

After a week of intense negotiations in the Swedish capital, the summary for policymakers on the physical science of global warming has finally been released. For the future, the report states that warming is _____ to continue under all _____. Prof Sir Brian Hoskins, from Imperial College London, told BBC News: "We are performing a very dangerous _____ with our planet, and I don't want my grandchildren to suffer the _____."
