

AMPHIBIANS, REPTILES AND INVERTEBRATES

AMPHIBIANS

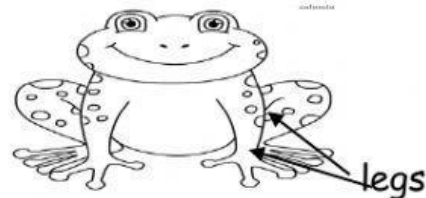

1.Circle the correct option:

- Amphibians are **vertebrates** / **invertebrates**.
- Amphibians live **on land and in water** / **in water**.
- Amphibians lay eggs. They are **viviparous** / **oviparous**.
- Young amphibians have got **a tail** / **legs**. Adult amphibians have got **a tail** / **legs**.
- Young amphibians breathe with **gills** / **lungs**. Adult amphibians breathe with **gills** / **lungs**.

YOUNG AMPHIBIAN

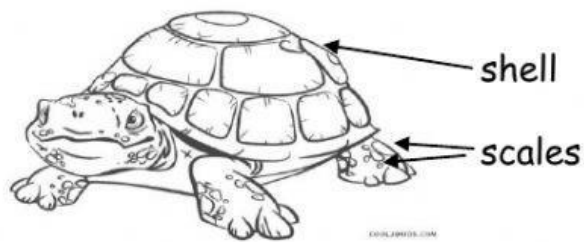

ADULT AMPHIBIAN

REPTILES

2.Circle the correct option:

- Reptiles are **vertebrates** / **invertebrates**.
- Reptiles live **on land and in water** / **in water**.
- Reptiles lay eggs. They are **viviparous** / **oviparous**.
- Reptiles have **scales** / **feathers**.
- Some reptiles have **a shell** / **an exoskeleton**.

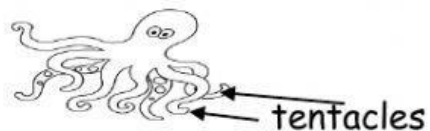

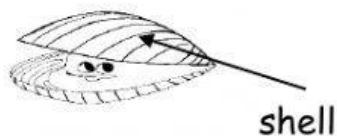

INVERTEBRATES

3.Circle the correct option:

Molluscs are **vertebrates** / **invertebrates**.

Molluscs have a **shell** / **an exoskeleton**.

Some molluscs have **tentacles** / **legs**.

4.Circle the correct option:

Arthropods are **vertebrates** / **invertebrates**.

Arthropods have got a **shell** / **an exoskeleton**.

Arthropods have got **legs with joints** / **scales**.
